1. The following communication is in response to applicant's amendment received 28-February-2008. Claims 1, 4, and 7-18 are pending in the application. Claims 2, 3, 5, and 6 are canceled.

Examiner's Amendment

2. An Examiner's Amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 C.F.R. 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the Issue Fee.

2.1 In the Specification:

Page 11 line 11 Change "U.S. Patent Application Serial No. _____" to --U.S. Patent No. 7,124,289--.

2.2 In the Claims:

Claim 1 line 14 Change "DNS domain masters" to --DNS domain masters entities--.

Reasons for Allowance

3. The following is an Examiner's Statement of Reasons for the indication of allowable subject matter.

3.1 Claims 1, 4, and 7-18 are considered allowable, since when reading the claims in light of the specification, as per MPEP § 2111.01, none of the references of record alone or in combination disclose or suggest the combination of limitations specified in independent claims nos. 1 and 7, including: (in regard to claim 1)

configuring a central database to be able to implement the DNS data model **[defined at** p. 4, line 19 through p. 5, line 14], the DNS data model including- DNS domains entities that represent DNS domains of devices connected to a computer network and are related to various entities representing DNS permissions and types selected from the group consisting of DNS ACLs entities [p. 75, line 12 through p. 76, line 3], DNS ACL entries entities [p. 76, line 5 through p. 76, line 15], DNS allow transfers entities [p. 77, line 1 through p. 78, line 2], DNS allow queries entities, DNS domain types entities p. 79, line 1 through p. 80, line 24], DNS domain masters entities [p. 82, lines 1-14], and DNS master IPs entities [p. 83, lines 1-15]; and DNS hosts entities that represent various DNS hosts connected to the computer network [p. 74, line 1 through p. 75, line 10]; and automatically provisioning the computer network according to the DNS data model [p. 107, lines 9-20].

Dependent claims 4 and 8-18 are deemed allowable as depending either directly or indirectly from independent claims 1 and 7.

3.2 The instant application is directed to a non-obvious improvement over the information described in the article authored by Rabinovich et al., entitled *RaDaR: a scalable architecture for a global Web hosting service*, which discloses monitoring the load of a large pool of servers and migrating or replicating objects among them to distribute their load and to move replicas closer to the requesting clients.

Art Unit: 2128

3.3 The art of record, either individually or in combination, fails to teach, suggest, or render obvious the specific arrangement of elements in the same combination as now required by the amended claims. In view of the foregoing, the claims of the present application are found to be patentable over the prior art.

Response Guidelines

4. Any comments considered necessary by applicant **MUST** be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably accompany the Issue Fee. Such submissions should clearly be labeled "Comments on Statement of Reasons for Allowance".
